

Google Translate Offline: ¡Es fantástico!

Google Translate can be downloaded onto your phone so that you can use it even *without* an internet or cellular connection. Muy genial!

There are 59 languages available to download. And 32 of those languages can be used (if you have a cellular or wifi connection) for two-way *instant* speech translation. Seriously! Speak into your phone, in English – and have the phone translate (and speak!) whatever you said to your taxi driver or waiter or friend.

AND if that's not enough – when you do have a cellular or wifi connection, you can take a picture of any one of 38 foreign-language sign with your phone – and have Google translate it into English instantly!

1. On your Android phone, open the Google Playstore app – and search for Google Translate.
2. DOWNLOAD the app.
3. When it's done downloading, INSTALL it.
4. Open the app.

Click the ▼ and choose English

Click

These icons indicate that you have downloaded them for offline use.

These icons indicate that a language is available to be downloaded for offline use.

Click CAMERA icon to translate a SIGN (Internet connection needed)

Click HANDWRITING then use your finger to write freehand

Click CONVERSATION and start talking. An audio of the translation will automatically be heard. (Internet connection needed)

Click VOICE and start talking. A written translation will appear. You can click the little audio symbol to hear the translation. (Internet connection needed)

¡Que te diviertas!
